### **DETAILED ACTION**

Applicant's election with traverse, of Group I, claims 1-3 and 6-10 and heparin/heparan sulfate or a partially desulfated modification thereof as the species for W in formula (I) for prosecution in their response (Paper 11) filed August 8, 2003 is acknowledged. Since Group II is drawn to surface modified medical instruments it would be a burdensome search. The restriction is made final.

#### ***Specification***

The disclosure is objected to because of the following informalities: At page 25 where the claims begin, the term "Claims" at the top of the page should be replaced by either "We Claim" or "What is claimed is". Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tay et al (Biomaterials, 1989, Vol. 10(1), pp 11-15) and Larsson et al (WO 93/05793).

Tay et al disclose the coupling of heparin to the hydroxyl group of polyvinyl alcohol (page 13, section entitled "Coupling of Heparin to Hydrogels).

Larsson et al disclose a conjugate comprising a straight chain organic homo- or heteropolymer having a number of functional groups distributed along the polymer backbone, which have groups of at least 20 molecules of sulfated glycosaminoglycans are anchored through

Art Unit: 1623

covalent bonds. The glycosaminoglycans comprise heparin, heparan sulfate, dermatan sulfate, chondroitin sulfate and fragments and derivatives of these substances (page 7, lines 5-35; page 21, example 7; pages 26-28, claims 1-5, 7-12 and 18).

These disclosures of Tay and Larsson are seen to meet the limitations of claims 1-3 and 6-10. The recitation in claims 2 and 8 as to how the carbohydrate chain is obtained is not given patentable weight.

***Conclusion***

1. Claims 1-3 and 6-10 are rejected.
